Effective communication skills are an essential part of leading a productive research group, whether in academia or industry. Invest time to explore your leadership style and your ability to direct and motivate others.

**THE WORKSHOP**

Join us for this unique opportunity to take part in a leadership-training workshop offered typically in a corporate environment. This workshop is specifically tailored for academic researchers: faculty, postdoctoral scholars, and senior graduate students who are ready to advance their careers.

UCSF Professor and experienced science leadership training expert, Ed O’Neil, will guide the workshop through seminars, small group discussions and case studies.

At the end of the one and a half day workshop, you will better understand:

- your leadership style and how it impacts the way you lead and motivate
- how to communicate with individuals with different personality types
- how to give and receive feedback

**RSVP**

Enrollment is limited to 120 participants.

For more information and to register, please visit: [http://registration.ctrl.ucla.edu/career-dev-workshop/](http://registration.ctrl.ucla.edu/career-dev-workshop/)

This one and a half day workshop is provided to research scientists for a modest registration fee, thanks to the generous sponsorship of the following UCLA organizations:
