Dr. Lisa Balbes earned her Ph.D. in organic chemistry from the University of North Carolina at Chapel Hill and her undergraduate degrees in chemistry and psychology from Washington University in St. Louis. She completed a post-doctoral posting in computational chemistry at Research Triangle Institute and was then promoted to “real person” and started their protein modeling program.

Dr. Balbes is currently a counselor for the St Louis local section of the ACS, and is the 2011 chair of ACS’s national Committee on Economic and Professional Affairs, as well as co-chair for the 2011 Midwest/Great Lakes Regional Meeting. She has been an ACS volunteer career consultant since 1993, providing advice and information to literally thousands of scientists, and is an internationally invited speaker on career management and development for scientists. She is the author of “Nontraditional Careers for Chemists”, published by Oxford University Press in 2007.

This workshop will teach you how to manage your online and offline professional image, building your network so more opportunities will come your way, and learning to interview effectively to take advantage of those opportunities.

March 22
3:00-6:00 PM
