Dr. Peter Bowers will share his experiences founding a company after an academic postdoc. He will walk us through the basic steps of the process and the barriers he overcame to have a successful start-up company.

Dr. Bowers is the co-founder of Anaptysbio, a therapeutic antibody product company in San Diego. He currently is the senior director of protein engineering and computational biology where he plays a crucial role in the strategic leadership of his research department and the company’s technology.

Dr. Bowers completed his PhD in Biochemistry in 1998 at the University of Washington. After two years of postdoctoral training, he joined a start-up company in Woodland Hills, CA. Dr. Bowers later joined UCLA as a research fellow, where he developed computational methods to build protein networks and to decipher cellular processes from genomic data.

Feb 21st, 2013
CNSI Executive Conference Room

Space is limited!
RSVP to education@cnsi.ucla.edu

Thursday, 12:00-1:30 PM

To ensure a fully interactive experience for each participant, attendance is limited to 15 postdocs/graduate students per luncheon. If you are interested in attending, please include a 3-5 sentence statement indicating how your attendance will benefit your specific career interests.

Interested parties must respond by Sunday, February, 17 2013 to education@cnsi.ucla.edu. Selected participants will be notified by Tuesday, February 19th, 2013.
